

Liat (2020) Limited

Factorial Performance (AVD) — Day-to-day Operating Guide

For: LIAT People & Culture, line managers, and employees
Language: English (menu labels stay in English in Factorial)
Company demo: Liat Air Revamp (demo company **195679**)
Last updated: September 2026

This is LIAT's **front-screen operating guide** for running performance appraisals in Factorial.
Use it when you need to create and cascade goals, run reviews (AVDs), rate competencies, coach at mid-year, and close the year with a 9-box view.
It is **not** the HRIS vendor evaluation framework. Keep that separate.

How to use this guide (start here)

If you need to...	Go to section
Understand words / buttons	§3 Terms you will see
Find menus in Factorial	§4 Getting around
Create or cascade BSC goals	§6 Goals (especially §6.3 Cascade)
Run Q1 / Mid-Year / Year-End reviews	§7 Reviews (AVDs)
Rate competencies	§9 Competencies
Finish year-end + 9-box	§8 Year-end and the 9-box
Open trainings or this PDF	§10 Training · §11 Documents
Follow a role checklist	§12–§14

Golden rule for LIAT goal cascade

Whole company (parent)	→	Team (sub-goal)	→	Employees (sub-goal)
---------------------------	---	--------------------	---	-------------------------

Correct demo example: Whole company → Team **LIAT Flight Operations** → Employees **Tamara Joseph**
Wrong: employee → employee (for example Marcus as a person → Kamala as a person). Do **not** cascade that way.
Demo goals that already show this pattern are labeled **(WCTE)** in the Goals list.

1. What this guide covers

In scope (this guide)	Out of scope (elsewhere)
BSC goals and cascade	Staff Travel
Q1 goal setting & agreements	Leave / Time off detail
Mid-year review + coaching / IDP	Payroll / Xandapay
Year-end appraisal + 9-box	Recruitment / ATS
Competencies (70% / 30%)	HITIT / CPAT integrations
Trainings & company documents for the cycle	Other HRIS modules

AVD here means the Factorial **Performance review** cycle: self-review, manager review, goals, competencies, and (at year-end) potential for the 9-box.

Official product help: [Factorial Help Center — Performance](#).

2. How LIAT's model maps to Factorial

LIAT practice	Where in Factorial
Corporate → department → individual scorecards	Performance → Goals (parent goal + sub-goals), using Assign to types
Four BSC perspectives	Goal titles / descriptions tagged Financial, Customer, Internal Process, L&D
Final rating 70% objectives / 30% competencies	Review questionnaire sections + Competencies assessment
Rating scale DNM / PMS / MET / EXC / SIG	Review Scoring range / rating labels
Quarterly appraisal cycle	Three review processes (Q1, Mid-Year, Q4)
360° (self / supervisor / peer)	Review types: Self-review, Manager, Peer
Coaching & IDP	Questionnaire sections + action plans on the review
Talent / succession (9-box)	Q4 feature Add potential score → Talent analytics / 9-box
Manager enablement	Training courses + this PDF in Documents

3. Terms you will see (plain language)

Term on screen	What it means for LIAT
----------------	------------------------

Performance	The left-menu area for reviews, goals, competencies, and feedback
Reviews / AVD	A formal appraisal process (Q1, Mid-Year, or Year-End)
Goals	BSC objectives you create, track, and cascade
Assign to	Who the goal belongs to: Whole company, Team, Employees, etc.
Parent goal	Higher-level goal (for example company or team)
Sub-goal	Child goal that sits under a parent (how cascade is built)
Whole company	Assign-to type for a corporate / airline-wide goal
Team	Assign-to type for a department scorecard (example: LIAT Flight Operations)
Employees	Assign-to type for one person's SMART goal
(WCTE)	Demo label = Whole company → Team → Employees cascade already built
Self-review	Employee fills their own appraisal answers
Manager review	Line manager fills the supervisor appraisal
Peer review	360° input from colleagues
Competencies	Behaviours / skills rated alongside goals (30% of the story)
IDP	Individual Development Plan (coaching actions)
Potential score	Manager-only input used for the 9-box at year-end
9-box	Grid of performance × potential for succession discussions
Inbox	Where tasks waiting for you appear (reviews, agreements)
Documents	Company files (this guide lives here)
Training	Courses assigned to managers / staff

4. Getting around Factorial

4.1 Sign in and open Performance

1. Sign in to Factorial (demo company **Liat Air Revamp / 195679**).

2. Look at the **left sidebar** (menu on the left).
3. Click **Performance**.
4. Use the tabs across the top: **Reviews, Goals, Competencies, Feedback**.

4.2 Other menus you will use

Menu (sidebar)	What you do there
Inbox	Open pending review / agreement tasks
Training	Open BSC / 9-box / coaching / safety courses
Documents	Open LIAT Factorial AVD Operating Guide.pdf and other company files
Company / announcements	Read cycle open / mid-year / 9-box posts

Tip: Keep saying the English button names in training (“click **Goals**”, “click **Add sub-goal**”). That matches what people see on screen.

5. The LIAT performance year (one picture)

Whole company (corporate BSC parent)	Assign to = Whole company
↓ cascade	
Team / department scorecard	Assign to = Team
↓ cascade	
Individual SMART goal	Assign to = Employees
↓	
Q1 Goal Setting & BSC Planning (agreements + cascade)	→ Mid-Year Review (progress + coaching) → Year-End & 9-Box (70/30 + potential)

Rule: No orphan goals. Every individual goal should link upward through **Whole company** → **Team** → **Employee** using **sub-goals**.

6. Goals — create, cascade, and maintain

6.1 Where to click

1. Left sidebar → **Performance**
2. Tab → **Goals**
3. Select the year (**2026**) if asked
4. Click **+ Add goal** (or **New goal**) to create, **or** open an existing goal to add **sub-goals**

6.2 Understand “Assign to” (critical)

When you create a goal, Factorial asks **Assign to**. This is **not** the same as naming a manager in free text. Choose the **type** first, then the team or person.

Assign to type	Use for	LIAT example
----------------	---------	--------------

Whole company	Corporate / airline-wide BSC parent	Network OTP and Safety 2026
Team	Department scorecard	Team LIAT Flight Operations
Employees	One person's SMART goal	Tamara Joseph
Legal entity / Role	Only if People & Culture specifically asks	Usually not needed for the BSC demo

Do this: company → team → employee

Do not do this: pick employee Marcus, then add employee Kamala as a “cascade”. That is **employee → employee** and is **wrong** for LIAT’s BSC model.

6.3 How to create a goal (step-by-step)

1. **Performance** → **Goals** → **+ Add goal**.
2. **Name:** start with a BSC tag, for example
[Customer / Stakeholder] Maintain on-time performance on assigned routes.
3. **Description:** write Measure + Due date (SMART). Example:
Measure: OTP >= 85% on designated flights | Due: 2026-12-31.
4. **Assign to:** choose the correct type (Whole company / Team / Employees), then pick the team or person.
5. **How it's measured:** Percentage is fine for most BSC targets (or **Based on sub-goals** for a parent that should roll up from children).
6. Set **Target value** (and periods if shown) → **Save**.

More help: [About Goals](#) · [Cascading goals](#).

6.4 How to cascade (parent → child) — LIAT way

Factorial does **not** cascade automatically. You build the tree on screen.

Step A — Corporate parent

1. Create (or open) the parent goal.
2. Set **Assign to = Whole company**.
3. Save.

Step B — Team sub-goal

1. Open that parent goal.
2. Open the **Sub-goals** area → click **Add sub-goal** (or **+ Add sub-goal**).
3. Set **Assign to = Team**.
4. Select the department team (example: **LIAT Flight Operations**).
5. Save.

Step C — Employee sub-goal

1. Open the **team** goal (not the corporate parent this time).
2. Click **Add sub-goal** again.
3. Set **Assign to = Employees**.
4. Select the person (example: **Tamara Joseph**).

5. Save.

Step D — Check the chain

1. On the company goal, you should see the team goal under **Sub-goals**.
2. On the team goal, you should see the employee goal under **Sub-goals**.
3. Breadcrumb / hierarchy should read: company → team → employee.

Alternative link method: open a lower goal → **Add parent goal** → pick the higher goal. Same result: one parent only per goal.

6.5 Demo cascade to open and show (WCTE)

These demo goals already exist and are labeled **(WCTE)**:

Level	Assign to	Who / what	Goal to open
1 Parent	Whole company	Liat Air Revamp	[Corporate BSC / Customer] Network OTP and Safety 2026 (WCTE)
2 Sub-goal	Team	LIAT Flight Operations	[Dept BSC / Customer] Flight Ops team OTP lift
3 Sub-goal	Employees	Tamara Joseph	[Individual / Customer] Route OTP on assigned flights

How to walk it on screen

1. **Performance** → **Goals**.
2. Search or open **Network OTP and Safety 2026 (WCTE)**.
3. Click **Sub-goals** → open **Flight Ops team OTP lift**.
4. Click **Sub-goals** again → open **Route OTP on assigned flights** (Tamara Joseph).
5. Say out loud: “Whole company → Team → Employees — not person to person.”

6.6 Good practice for LIAT

1. Tag every title with one BSC perspective.
2. Put Measure and Due in the description.
3. Prefer **sub-goals** over duplicate unlinked goals.
4. Managers finish cascade by end of Q1.
5. Do not leave goals only in a Word pack — they must live in Factorial **Goals**.
6. If a goal has no parent and no team link, treat it as an orphan and fix it.

7. Reviews (AVDs) — the three LIAT processes

Your account should contain these processes (names match the demo):

Process	When	Purpose
LIAT Q1 Goal Setting & BSC Planning 2026	Early year	Agree SMART goals; start agreements; confirm cascade
LIAT Q2-Q3 Mid-Year Review 2026	Mid-year	Progress vs BSC; coaching; IDP update; 360° where enabled
LIAT Q4 Year-End & 9-Box Review 2026	Year-end (may start as Draft)	Final 70/30 rating + potential for 9-box

7.1 Where to click (everyone)

1. **Performance** → **Reviews**.
2. Open the LIAT process by name.
3. Or open the task from **Inbox** (often faster day-to-day).

People & Culture only: use **Edit** on the process for types, score, features, and participants — before launch when possible.

7.2 Questionnaire blocks you will see

- **LIAT BSC Objectives (70%)** — rate / comment by perspective
- **Competencies assessment** — native Factorial competencies (30% of the story)
- **LIAT 360° Feedback** — peer input where enabled (especially Mid-Year)
- **LIAT Coaching & IDP** — development actions
- **Overall performance / potential** (Year-End)

7.3 Rating scale (use these labels)

Code	Meaning
DNM	Did Not Meet Expectations
PMS	Partially Met Some Expectations
MET	Met Expectations
EXC	Exceeded Expectations
SIG	Significantly Exceeded Expectations

7.4 Weights 70 / 30

People & Culture must confirm in review settings that objectives and competencies follow LIAT's **70% / 30%** rule. If **Custom weights** is available, set section weights accordingly. Questionnaire titles already state the 70% objectives intent.

7.5 Self-assessment and manager review

LIAT requires **self** and **supervisor** input.

1. Keep **Self-review** and **Manager** turned on for each LIAT process.
2. Employee completes Self-review from **Inbox** or the process.
3. Manager completes Manager review for each direct report.
4. Discuss outcomes in a 1:1 before closing when policy requires it.

7.6 Peer review (360°)

1. Process **Edit** → **Review types** → enable **Peer review** while the process is still editable.
2. Assign peer evaluators / groups in the UI.
3. Prefer peers for Mid-Year and Year-End.

7.7 Mid-year — what to do on screen

1. Open **LIAT Q2-Q3 Mid-Year Review 2026**.
2. Employee: update progress comments on BSC objectives and competencies.
3. Manager: confirm progress, note risks (OTP, safety, audit), and update coaching.
4. Complete the **Coaching & IDP** section with clear owners and dates.
5. If peer review is on, complete or chase peer input.
6. Submit / acknowledge per the process rules.

7.8 Agreements (Q1)

If goal agreements do not start from automation:

1. Open the Q1 process.
2. **Initiate agreements** from the review UI so each participant has a clear Q1 contract.
3. Employee and manager complete / accept the agreement tasks from **Inbox**.

7.9 E-signature

Where Signaturit / e-signature is licensed, enable signature on action plans or appraisal close-out so both employee and manager sign. If the toggle is locked on the demo, People & Culture documents the manual acknowledgement step for production.

More help: [About Performance reviews](#).

8. Year-end and the 9-box

8.1 Complete the Year-End AVD

1. Open **LIAT Q4 Year-End & 9-Box Review 2026**.
2. Confirm feature **Add potential score** is ON (feeds the 9-box; potential is hidden from the employee).
3. Employee completes Self-review (objectives + competencies + comments).
4. Manager rates performance (70% objectives / 30% competencies story) and enters **potential**.
5. People & Culture + line managers calibrate in a closed session.
6. Use outcomes for succession, development, and compensation discussions.

8.2 9-box access rule

Access to 9-box / Talent analytics views should stay limited to **HR + direct line managers**.

More help: [About Talent analytics / 9-box](#).

9. Competencies

1. Left sidebar → **Performance** → **Competencies** (company library).
2. LIAT demo competencies include Safety Compliance, Teamwork, Accountability, plus role packs (Flight Ops, MRO, Commercial, Management, Executive).
3. Before Mid-Year and Year-End, People & Culture confirms jobs / people have the right competencies assigned.
4. During an AVD, rate competencies in the review questionnaire — they sit beside BSC objectives.
5. Remember: competencies are about **how** the work is done; goals are about **what** was delivered.

More help: [About Competencies](#).

10. Training and communications

10.1 Open a training course

1. Left sidebar → **Training**.
2. Open the assigned course.
3. Complete modules before you cascade goals or run mid-year coaching.

10.2 Courses in the LIAT demo

- LIAT Balanced Scorecard Essentials for Managers
- LIAT 9-Box Talent Review Workshop
- LIAT Performance Coaching & IDP
- LIAT Safety & Compliance Awareness

10.3 Announcements

Use **Company announcements** (or Posts) to announce cycle open / mid-year / 9-box prep so the whole airline sees the same calendar.

11. Documents — open this PDF inside Factorial

Store / open this guide under company documents so managers can read it without leaving Factorial.

Filename: LIAT Factorial AVD Operating Guide.pdf

Step-by-step — open the guide

1. Sign in to Factorial.
2. Left sidebar → **Documents**.
3. Open the **company** / company internal documents space (not only “My documents”).
4. Find **LIAT Factorial AVD Operating Guide.pdf**.
5. Click the file name to preview or download.

6. Keep it open beside **Performance** → **Goals** the first time you cascade.

If you cannot see it, ask People & Culture — the file is meant to be a **company_internal** document visible to managers.

More help: [About Documents](#).

12. Step-by-step — People & Culture checklist (first launch)

1. Confirm legal entity, location (VC Bird), teams, and managers.
2. Confirm the three LIAT review processes exist and participants are correct.
3. Confirm rating scale labels (DNM–SIG).
4. Confirm Self-review + Manager (+ Peer where required).
5. Confirm competencies assessments enabled.
6. Confirm Q4 potential score (9-box) enabled.
7. Create **corporate parent goals** (**Assign to = Whole company**), then cascade with **Team** and **Employees** sub-goals.
8. Spot-check the **(WCTE)** demo chain: company → LIAT Flight Operations → Tamara Joseph.
9. Publish announcement + assign manager trainings.
10. Upload / confirm this PDF in **Documents**.
11. Launch / start agreements for Q1.

13. Step-by-step — employee completing an AVD

1. Open **Inbox** (or **Performance** → **Reviews**).
2. Open your LIAT review task.
3. Complete **Self-review**: BSC objectives, competencies, comments.
4. Open **Performance** → **Goals** and confirm your goals are current and linked upward (team / company), not orphans.
5. Add coaching / IDP notes when the form asks.
6. Submit. Wait for manager review and any signature / acknowledgement step.

14. Step-by-step — manager completing an AVD

1. Open your team's LIAT review from **Inbox** or the process.
2. For each report: open **Goals** and check cascade links (team under company; person under team).
3. Complete **Manager** questionnaire and competency ratings.
4. At Mid-Year: update IDPs and coaching notes with owners and dates.
5. At Year-End: complete overall rating and **potential** (for 9-box).
6. Discuss outcomes in 1:1; close the review / e-sign if required.

Manager cascade checklist (Q1)

1. Open the corporate parent that applies to your area.

2. Confirm your **Team** sub-goal exists (**Assign to = Team**).
3. Add / confirm each report's **Employees** sub-goal.
4. Do **not** assign the department goal to yourself as an employee and then cascade person-to-person.

15. Roles and who does what

Role	Typical Factorial actions
People & Culture (HR)	Own review processes, weights, competencies, 9-box access, announcements, trainings, documents
CEO / HoDs (leadership)	Set corporate and department parent goals using Whole company / Team; approve cascades; calibrate 9-box
Line managers	Cascade team → employee goals; complete manager reviews; coach; update IDPs
Employees	Own SMART goals; complete self-review; acknowledge / sign when required

Demo cast (examples):

- Marcus Williams — CEO
- Denise Antoine — Head of HR
- Robert Clarke — CFO
- Kamala Singh — Director of Flight Operations
- Tamara Joseph — Senior Pilot (staff example)

16. Governance reminders

- AI drafting (if enabled): **edit before submit**; keep audit trail of draft vs final.
- 9-box: HR + line manager only.
- Do not close year-end without both parties' acknowledgement / e-sign when policy requires it.
- Keep OTP, safety, and audit measures measurable in goal descriptions.
- Cascade type rule: **Whole company** → **Team** → **Employees** only.

17. Quick troubleshooting

Problem	What to try
Goal has no link to company strategy	Open the goal → Add parent goal → pick the team or company parent
Cascade looks like CEO person → manager person	Recreate as Whole company → Team → Employees (see §6.4)

Cannot find a review task	Check Inbox , then Performance → Reviews
Competencies missing in the form	Ask HR to check competency assignment for the job / process
Cannot see 9-box	Confirm Q4 Add potential score is on and your role is HR or line manager
Cannot find this PDF	Documents → company space → filename above; ask HR if missing
