

Statistical Institute of Jamaica (STATIN)

Using Factorial in your HR scope

For: STATIN employees, managers, and Human Resources

Language: English

Last updated: September 2026

1. What this manual is for

This is STATIN's **user guide** for Factorial within the processes you run today:

- Organisation (Divisions, Units, roles)
- The five staffing processes: permanent recruitment, appointment, job letters, special project recruitment, transfers/promotions
- Leave (vacation and other absences)
- Competencies (GoJ Core and STATIN Technical)
- Performance Management System (Individual Work Plans, coaching, year-end appraisal)
- Training linked to performance
- Company and employee documents

Factorial is your **system of record** for people, jobs, leave, performance cycles, hiring activity and HR documents. Some STATIN governance steps (for example IRHC approval or Ministry vacancy control) continue **outside** Factorial and are noted in each chapter.

For product detail beyond this manual, use the [Factorial Help Center](#).

2. How STATIN processes map to Factorial

Your STATIN process	Where you work in Factorial
Divisions / Units and reporting lines	Organization → Teams, Org chart
Roles, levels and job structure	Job catalog
1. Permanent recruitment and selection	Recruitment (ATS) + Documents
2. Appointment of staff (probation → confirmation)	Employee profile, Tasks , Documents , reviews
3. Job verification / job letter	Documents + employee profile
4. Special project recruitment (field / census-style)	Recruitment (temporary jobs) + Documents + Training
5. Staff transfer / promotion (competitive or internal)	Recruitment and/or job, team and manager update
Vacation and other leave	Time off

Individual Work Plans and appraisals	Performance
GoJ / STATIN competencies	Performance → Competencies (used in reviews)
Manager coaching conversations	Performance coaching reviews
PMS learning	Training
HR packs and letters	Documents

3. Getting around Factorial

1. Sign in to Factorial with your STATIN account.
2. Use the **left sidebar** to open each module (Organization, Recruitment, Time off, Performance, Training, Documents).
3. Use **Inbox** for requests waiting for your approval (for example leave).
4. Open a colleague from **Organization** to see their profile (team, manager, leave, documents).
5. Administrators use **Settings** to maintain policies (for example Time off policies and permission groups).

Tip: Menu names in Factorial are in English. This manual uses those same names.

4. Organisation, teams and job catalog

What STATIN uses this for

Your planning cascade remains:

Government priorities → Strategic Plan → Division Plan → Unit Plan → **Individual Work Plan**

In Factorial, Divisions and Units are represented as **Teams**, for example:

- Office of the Director General
- Corporate Services
- Field Services
- Economic and Social Statistics
- Human Resources

Managers appear on the **organisational chart** through each person's reporting line.

What you do day to day

Role	Typical actions
HR / Admin	Keep teams, managers and job assignments accurate; maintain the Job catalog (roles and levels / bands).
Manager	Confirm your team membership and direct reports.

Employee	Check that your team, manager and job are correct on your profile.
-----------------	--

Where to click

1. Sidebar → **Organization**
2. **Teams** — find your Division / Unit
3. **Org chart** — see reporting lines
4. **Job catalog** — roles and levels (aligned with GoJ bands where used for competencies)

Good practice for STATIN

1. Keep team names consistent with Division / Unit planning documents.
2. Every employee should have a clear **team** and **manager**.
3. Keep Job catalog levels aligned with the bands you use for competency frameworks (Bands 1–6).

More help: [Teams, jobs & organizational chart](#)

5. Leave (vacation and other absences)

Leave types available for STATIN

In **Time off**, use the SIJ leave types configured for your organisation, including:

- SIJ Vacation Leave
- SIJ Sick Leave
- SIJ Maternity Leave
- SIJ Study Leave
- SIJ Compassionate Leave
- SIJ Special Leave

Vacation entitlement bands

Vacation policies follow STATIN entitlement bands. Your own band and balance appear on your Time off screen.

Band	Days per year	Carry-over ceiling (3 years)
Base	15	45
Intermediate	20	60
15–25 years' service	21	63
Senior	25	75

How balances work (in simple terms)

- Leave is counted in **working days** (Monday–Friday).

- Public holidays do **not** reduce your vacation entitlement.
- Entitlement can accrue over the year (**prorata**).
- Unused days can **carry over** within the rules of your policy (up to about 36 months, capped at three times the annual entitlement).
- Half-day rounding may apply depending on policy settings.

HR can also make a **manual balance adjustment** when a special case requires it (for example recall of leave).

Employee — request leave

1. Sidebar → **Time off**
2. Click **Add time off**
3. Choose the leave type (for example **SIJ Vacation Leave**)
4. Select dates (and half days if offered)
5. Attach a document if the leave type requires it
6. Submit — your approver is notified

Until approval, the day may not leave your available balance (depending on how the allowance is set).

Manager / HR — approve leave

1. Open **Inbox** → **Requests**, or
2. Open the employee's profile → **Time off**
3. **Approve** or **Reject** the request

HR administrators maintain types, policies and allowances under:

Settings → **Time** → **Time off**

What stays with STATIN process (not fully automatic in Factorial)

1. A strictly **daily** accrual formula (entitlement ÷ days in the year) is represented through Factorial's accrual settings; HR monitors balances for edge cases.
2. Pausing accrual during long absences (for example after many consecutive leave days) may need HR review and adjustment.
3. Returning days after a leave **recall** is done with a manual allowance adjustment.

More help: [Absences & approvals](#) · [Time off settings](#) · [How to request and assign time off](#)

6. Competencies (GoJ Core and STATIN Technical)

Why they matter

STATIN's rating guidance for year-end appraisal is:

- **60%** measurable performance targets
- **40%** competencies

Competency sets used at STATIN

GoJ Core

1. Communicating Effectively
2. Working Collaboratively
3. Developing Capability
4. Seeing the Big Picture
5. Driving Continuous Change and Improvements
6. Making Effective Decisions
7. Demonstrating a Commercial and Business Mindset
8. Ensuring Value for Taxpayers Money
9. Providing a Quality Service

STATIN Technical

1. Information Management
2. Communication and Service Delivery

Competencies are organised in Factorial, linked to **jobs / levels** in the Job catalog, and assessed inside **Performance** reviews when competency assessment is enabled.

Where to click

1. Sidebar → **Performance** → **Competencies** — view and maintain the library
2. Open a performance review — complete the **competency assessment** block for the person's job
3. HR can also **import** competencies and assignments with Factorial's Excel importers (from the Competencies area / import tools in the product)

Good practice

- Assess only the competencies assigned to the employee's job.
- Do not duplicate the same competency list as free-text questions if you already use the native competency assessment.
- Keep Job catalog levels and competency assignments in sync when roles change.

More help: [About Competencies](#) · [Competencies & goals](#)

7. Performance Management System (PMS)

How STATIN's cycle appears in Factorial

Process in Factorial	What it is for
STATIN FY 2025-26 Year-End Appraisal	Close the financial year: score targets and competencies, record band, development actions, accept or wish to appeal
STATIN FY 2025-26 Coaching Reviews	Record the coaching conversations required during the year (policy: at least three formal conversations before year-end)

STATIN FY 2026-27 Goal Setting and Individual Work Plan	Agree next-year targets and key outputs (EPM Form Sections 1–4), cascaded from Division / Unit plans
--	--

Target rating scale

Score	Meaning
5 — Exceeded	100%+ of target
4 — Met all	91–100%
3 — Met most	71–90%
2 — Met some	61–70%
1 — Met few	1–60%
0 — Met none	0%

Performance bands (final guidance)

Band	Range
Superior	100%
Very Good	91–99%
Good	80–90%
Satisfactory	75–79%
Unsatisfactory	Below 75% — Performance Improvement Plan (PIP) or development path

Employee — complete your part

1. Sidebar → **Performance**
2. Open the process assigned to you (Year-End, Coaching, or IWP)
3. Complete **self-assessment** where required
4. Add evidence / comments on targets
5. Complete competency ratings if asked
6. Submit your responses

Manager — coach and appraise

1. Open the same process for your direct reports
2. Review their targets and evidence
3. Complete manager ratings and comments

4. For coaching reviews, capture conversation notes and development actions
5. For year-end, record the indicative band and next steps (including PIP where score is below 75%)
6. Recommend incentives only where STATIN policy allows — Factorial records the recommendation; payroll action stays with HR / Finance processes

HR — run the cycle

1. Confirm participants on each process
2. Monitor completion
3. Support appeals through STATIN's grievance route (Factorial stores the “wish to appeal” signal; the formal appeal is a STATIN HR process)
4. Use **Talent analytics** / review analytics where available to see participation and trends

What Factorial does not replace

1. The exact **60% / 40%** arithmetic is guidance you apply in the appraisal — Factorial does not push it automatically into payroll.
2. Increment, promotion or incentive **payment** remains an HR / Finance decision.
3. Formal **appeals** follow STATIN grievance (and labour law if escalated).
4. Division / Unit Word templates can stay on STATIN's intranet; Factorial holds the individual cycle, scores and goals.

More help: [About Performance reviews](#) · [Performance review](#) · [About the Goals functionality](#)

8. Staffing processes in Factorial (overview)

STATIN runs **five** staffing processes. Factorial is the operational system of record for vacancies, candidates, employee records and HR files. Governance committees and some external systems stay outside Factorial — this chapter says clearly what happens where.

#	Process	Typical owners
1	Recruitment and selection (permanent posts)	Division Director, Corporate Services, HR Manager, Staffing Unit, POC/MoFPS, IRHC, Finance
2	Appointment of staff (probation → confirmation)	Staffing Unit, Supervisor, HR Manager, IRHC, Leave and Benefits Unit
3	Job verification / request for job letter	Employee, HR / Personnel Officers, Corporate Services
4	Special project recruitment	Director of Field Services, Corporate Services / HR, Staffing Unit, Project Manager, Training, General Services, Finance

5	Staff transfer / promotion	Same as recruitment (competitive) or HR Manager + IRHC (internal)
---	----------------------------	---

Shared Factorial navigation for staffing

1. Sidebar → **Recruitment** — jobs, candidates, applications, hiring pipeline, offer letters
2. Sidebar → **Organization** — employee profile, team, job, manager
3. Sidebar → **Documents** — recruitment folders, letters, medical and IRHC packs (company internal)
4. Sidebar → **Tasks** — probation reminders and onboarding checklists
5. Sidebar → **Training** — project training lists and PMS courses

More product help: [About the hiring pipeline](#) · [How to manage job applications](#) · [About the Offer letter](#) · [Onboarding workflow](#) · [Applicant Tracking System](#)

8.1 Recruitment and Selection (permanent posts)

This is the standard path to fill a permanent vacancy.

Phase 1 — Workforce need identified

What STATIN does

1. The Division / Unit identifies a vacancy.
2. The **Director of the Division** submits a request to the **Staffing Unit** to fill the vacancy.
3. Approval is obtained from the **Director, Corporate Services Division** and the **Human Resources Manager**.
4. The **Personnel Officer** prepares and delivers a letter to the **Post Operations Committee (POC) / Ministry of Finance and the Public Service** for approval to fill the vacant post.

In Factorial

1. Staffing Unit opens **Recruitment** → **Jobs** and creates a job in **Draft** (title, Division/team, description placeholder).
2. Upload or attach the Division request and internal approvals under **Documents** (company internal), linked to the job name.
3. Add a note on the job: “Awaiting POC / MoFPS approval”.

Outside Factorial

- POC / MoFPS letter and formal Ministry approval.
- Committee correspondence that is not stored as a company document.

Phase 2 — Job advertisement

What STATIN does

1. Staffing Unit prepares the vacancy advertisement:
 - Create the **Job Description** for the post.
 - Create a **job advertisement** derived from the Job Description.
 - **Director of Corporate Services** or **HR Manager** approves the advertisement.
 - Advertisement details go to the **Communication and Marketing Unit** for social media.

2. Corporate Services or HR decides whether the post is advertised **internally**, **externally**, or both (example: Editor Coders are temporary posts advertised internally).
3. Staffing Unit receives job applications.

In Factorial

1. Open the draft job → paste / attach the approved Job Description and advert text.
2. Set application requirements (CV, cover letter, phone, etc.).
3. Choose visibility: keep **Draft** for internal-only preparation, or **Publish** for the career site / external channel STATIN uses.
4. Tag or title clearly if the post is **internal only**.
5. Applications arrive as **Candidates / Applications** on that job.

Outside Factorial

- Social media production by Communication and Marketing.
- Email blasts that are not via Factorial careers (you can still register applicants manually in Recruitment).

Phase 3 — Screening and shortlisting

What STATIN does

1. Staffing Unit reviews all applications.
2. Staffing Unit shortlists using the **short list matrix** template.
 - Pass mark is normally **70%**.
 - Occasionally lowered to **60%** when that better reflects the strongest candidate pool.
3. Staffing Unit prepares the **interview schedule**.

In Factorial

1. Open the job → **Candidates / Applications**.
2. Move people through the **hiring pipeline** stages (for example: New → Screening → Shortlisted → Interview).
3. Attach the completed short list matrix and scores to the job or candidate.
4. Reject or archive candidates who do not meet the matrix.
5. Record interview dates in notes or schedule fields on the candidate.

More help: [About the hiring pipeline](#) · [How to manage job applications](#)

Phase 4 — Interview and assessment

What STATIN does

1. Staffing Unit writes to **Training and Development** to administer tests (if required) and to arrange lunch for panellists.
2. For non-head office posts: request interview locations; request a STATIN vehicle for panellists; write to **General Services** for refreshments at out-of-town venues.
3. For Head Office: write to **General Services** for refreshments and parking for external panellists and candidates.
4. Interviews are conducted by Staffing Unit, the Supervisor or Division Director, plus an **external panellist**.
5. Job interview tests are administered before or on interview day; scores are shared with panellists.
6. Interview package for each panellist: resume, job advertisement, job description, rating sheet.

7. Complete the **Interview Score Summary** (competency totals; identify the highest score).
8. Panel submits recommendations to Staffing Unit by **Memo**, with Interview Summary attached.
9. Staffing Unit requests a token/gift for the external panellist from Communication and Marketing.

In Factorial

1. Keep shortlisted candidates in an **Interview** pipeline stage.
2. Attach to each candidate (or to the job folder): resume, advert, JD, rating sheet, test scores, Interview Score Summary, panel Memo.
3. Record panel outcome and ranking in candidate notes.
4. Advance the preferred candidate; mark others as rejected / talent pool as STATIN policy allows.

Outside Factorial

- Venue, transport, lunch, parking and panellist tokens (Training, General Services, Marketing).
- Physical panel meeting logistics.

Phase 5 — Selection and approval

What STATIN does

1. Background check for the successful candidate(s):
 - **Reference Checklist** completed by the candidate's immediate supervisor (where applicable).
 - Recommendation from a notary public (for example Justice of the Peace / Police) or a manager.
2. Staffing Unit submits a request to the **Institutional Resilience and Human Capital (IRHC) Committee** (Director General chairs) for approval of the successful candidate.
3. Obtain **final IRHC approval**.

In Factorial

1. Move the chosen candidate to a stage such as **Offer pending / IRHC**.
2. Upload Reference Checklist, notary/manager recommendation, and IRHC request/approval memos to **Documents** (and link to the candidate/job).
3. Do not issue the formal offer until IRHC approval is on file.

Outside Factorial

- IRHC meeting, minutes and formal committee decision.

Phase 6 — Recruitment folder

What STATIN does

There is a **recruitment folder for each post**. It must contain:

- Panellist interview rating sheets
- Candidate qualifications
- Photocopied identification
- Resume and cover letter
- Completed short-listing document
- Interview score summary

- Job advertisement
- Interview schedule
- Short list matrix
- Approval for the person selected

In Factorial

1. Create (or use) a **company internal Documents** folder named for the post (for example Recruitment – [Post title] – [Year]).
2. Upload every artefact listed above.
3. Keep the same set on the job/candidate where Factorial allows attachments, so Staffing Unit has one operational view.

Phase 7 — Job offer

What STATIN does

1. Staffing Unit contacts the successful candidate.
2. Staffing Unit issues **two offer letters** for the candidate to review terms and conditions.
3. On acceptance: the candidate keeps one signed copy; the other signed copy goes in the candidate's folder in the HR cabinet (and digitally in Factorial).

In Factorial

1. Use the **Offer letter** flow on the candidate / job.
2. Store both the issued and signed copies in **Documents** (job folder and, after hire, employee documents).
3. Use **e-signature** when STATIN requires electronic signature.

More help: [About the Offer letter](#)

Phase 8 — Employment commencement

What STATIN does

1. Candidate reports for duty.
2. Educational documents: collection may start on interview day and is completed on orientation day.
3. Orientation and onboarding with the new employee.
4. Staffing Unit prepares the **Employment of staff form**; approvals by HR Manager or Director of Corporate Services, immediate Supervisor, and **Finance Unit**.
5. Form goes to Finance to process salary.

In Factorial

1. Convert / hire the candidate to an **employee**.
2. Assign team, manager and job in **Organization**.
3. Run **onboarding** checklist / tasks.
4. Upload educational documents and the Employment of staff form (with approvals) to employee **Documents**.
5. Notify Finance using your STATIN process; keep the approved form in Documents as the audit trail.

More help: [Onboarding workflow](#) · [What information is transferred when converting a candidate?](#)

8.2 Appointment of Staff Process

Used after someone has joined, to move from **probation** to **confirmed appointment**.

Phase 1 — Probationary period

What STATIN does

1. Employee serves a **six (6) month** probation period.
2. In the **4th or 5th month**, Staffing Unit notifies the supervisor that the **probationary report** must be completed.
3. Supervisor monitors performance; performance reviews are conducted.

In Factorial

1. Record probation end date / notes on the employee profile (custom field or contract notes as STATIN configures).
2. Create a **Task** for the supervisor in month 4–5: “Complete probationary report”.
3. Use **Performance** coaching or a short review if STATIN links probation to the PMS cycle.

Phase 2 — Probation assessment

What STATIN does

1. Supervisor submits the probation evaluation report.
2. **HR Manager** reviews the recommendation.

In Factorial

1. Upload the probation evaluation report to the employee's **Documents**.
2. HR Manager records recommendation in notes / Tasks completion.

Phase 3 — Medical examination

What STATIN does

1. Employee receives a referral for medical examination.
2. Employee completes the medical assessment.
3. Medical report is submitted to Human Resources.
4. Staffing Unit submits a request to **IRHC** for approval for appointment.

In Factorial

1. Store referral and medical report in employee **Documents** (restricted permissions).
2. Attach IRHC appointment request to the same pack.

Outside Factorial: medical clinic process and IRHC decision meeting.

Phase 4 — Decision

What STATIN does

- If **satisfactory**: IRHC recommends appointment / confirmation.
- If **unsatisfactory**: IRHC extends probation or terminates employment.

In Factorial

1. Update employee status / probation dates if extended.
2. If terminating, follow STATIN offboarding and Contracts / terminations practice in Factorial.
3. File IRHC decision letter in Documents.

Phase 5 — Confirmation of appointment

What STATIN does

1. Staffing Unit prepares the **Appointment / Confirmation Letter**.
2. Approval obtained from **HR Manager**.
3. Employee receives the letter.
4. Employee is referred to the **Leave and Benefits Unit** for benefits processes.

In Factorial

1. Generate or upload the Confirmation Letter (Document templates / e-signature as configured).
2. Place a signed copy on the employee profile.
3. Confirm leave policy assignment under **Time off** so Leave and Benefits can continue setup.

8.3 Job Verification / Request for Job Letter

Phase 1 — Request received

What STATIN does: Employee submits the request (typically by email). HR logs the request.

In Factorial: Log as a Task / Inbox item for Personnel; note the requesting institution if the letter goes to a third party.

Phase 2 — Verification

What STATIN does: Confirm employee status; verify employment information.

In Factorial: Check **Organization** profile (active status, job title, dates, team, manager).

Phase 3 — Letter preparation

What STATIN does: Prepare the employment verification / job letter.

In Factorial: Use a **Document template** for job letters; draft the letter and save under employee Documents.

Phase 4 — Approval

What STATIN does: Review and approval by Director Corporate Services / HR Manager / Senior Personnel Officer and Personnel Officer (as your signature matrix requires).

In Factorial: Route for approval via e-signature or upload the wet-ink signed PDF once approved.

Phase 5 — Issuance

What STATIN does: Hand-deliver or email to the employee, or email to the requesting institution.

In Factorial: Keep the final issued copy on the employee file; note date and recipient in comments.

8.4 Special Project Recruitment Process

For **Census, Labour Force Survey, Household Surveys, IES** and similar field / contract programmes.

Phase 1 — Project approval

What STATIN does

1. Project prepared by **Director of Field Services**.
2. Approved by **Director of Corporate Services** or **HR Manager**.
3. Staffing Unit identifies staffing requirements.

In Factorial: File project approval memo in Documents; create draft temporary job(s) for expected roles (Interviewers, Field Supervisors, HQ Editor Coders, other project staff).

Phase 2 — Consultation with project team

What STATIN does

1. HR Manager meets the Project Manager.
2. Agree numbers for Interviewers, Field Supervisors, HQ Editor Coders, other staff.
3. Receive a memorandum with required field staff numbers and approval.

In Factorial: Update job openings / headcount notes on each temporary job; attach the staffing memo.

Phase 3 — Advertisement

What STATIN does

1. Develop advertisements (same standards as permanent recruitment).
2. Publish recruitment notices by **email to Field Services Supervisors** so persons can be identified and shortlisted.

In Factorial: Publish temporary job postings; Staffing can also add candidates identified by Field Supervisors manually.

Phase 4 — Application collection

What STATIN does: Staffing Unit receives applications/resumes and creates an **application database**.

In Factorial: The job's **Candidates / Applications** list is the application database. Import or add candidates as they arrive.

Phase 5 — Screening

What STATIN does

1. Review applications.
2. Shortlist with a **rating sheet and questionnaire**; candidates evaluated with a **reading package**.
3. Pass mark **70%** (sometimes **60%**).
4. Contact candidates; receive and verify copies of **TRN, NIS** and identification.

In Factorial: Pipeline stages for screening; attach rating sheets and reading-package results; upload TRN/NIS/ID copies to the candidate (move to employee Documents after hire).

Phase 6 — Engagement (logistics)

What STATIN does

1. Write to Training and Development for lunch and accommodation (if required).
2. Write to General Services to secure interview venues (Field Offices, churches, other locations).

In Factorial: Optional logistics checklist as Tasks. Venue booking itself stays outside Factorial.

Phase 7 — Interview and selection

What STATIN does

Same interview standards as permanent recruitment: panel (Staffing, Supervisor/Director, external panellist), tests, interview package (resume, advert, JD, rating sheet), Interview Score Summary, Memo to Staffing, token for external panellist.

In Factorial: Same as Phase 4 of permanent recruitment — pipeline, attachments, ranking notes.

Phase 8 — Training

What STATIN does: Submit the final training participant list to process owners for training.

In Factorial: Enrol selected people in the relevant **Training** course/group; attach the participant list in Documents.

Phase 9 — Onboarding

What STATIN does

1. Arrange lunch/accommodation and onboarding venues (Training / General Services).
2. Contact successful candidates with onboarding location and reporting time.
3. Collect and verify: birth certificate, **TRN**, **NIS**, banking information, government ID, passport-sized photograph.
4. Facilitate acceptance and signing of: employment contract, **Oath of Secrecy**, Declaration Form, Attestation Form, Temporary Application Form, Job Description, Employee Incident Report Form.
5. HR Manager reviews the accepted offer letter.
6. Enter contract staff information into the **ProJems** database.

In Factorial

1. Hire / create temporary employees; assign Field Services (or project) team.
2. Upload the full document pack to employee **Documents**.
3. Use e-signature where STATIN allows.
4. Complete onboarding Tasks.

Outside Factorial: ProJems data entry (you may keep an export or checklist copy in Documents).

Phase 10 — Payments

What STATIN does: Submit **ProJems Reports** to Finance and Accounting for training expenses and other emoluments; HR Manager approves the report.

In Factorial: File the approved report copy in Documents for audit. Payment processing remains in Finance / ProJems.

8.5 Staff Transfer / Promotion Process

Competitive process

Follows the same spine as permanent **Recruitment and Selection**:

1. Workforce need identified (Division request → Corporate Services + HR → POC/MoFPS letter).
2. Job advertisement (JD → advert → approval → Marketing; internal and/or external).
3. Screening and shortlisting (matrix; 70% / sometimes 60%; interview schedule).
4. Interview and assessment (tests, panel pack, score summary, Memo, panellist token).
5. Selection and approval (background checks → IRHC).
6. Job offer (two letters; signed copies filed).
7. Employment commencement / move into the new role.

In Factorial (extra steps after competitive win)

1. Run the vacancy in **Recruitment** (internal candidates apply to the posting).
2. After IRHC and acceptance: update the person's **job**, **team** and **manager** in Organization.
3. Refresh Job catalog assignment and competencies if the new level differs.
4. File promotion / transfer letter in employee Documents.

Internal process (non-competitive)

What STATIN does

1. Vacancy identified.
2. Employee is recommended or applies.
3. Assessment conducted.
4. Approval received from **IRHC**.
5. New appointment / promotion letter issued by **HR Manager**.
6. HR records updated.

In Factorial

1. Record recommendation / assessment notes on the employee (and optional internal job draft if you still want a paper trail).
2. File IRHC approval and promotion letter in Documents.
3. Update job, team, manager and leave/benefits implications on the profile.
4. No full public advertisement is required for this path — keep the audit pack complete anyway.

9. Staffing checklist (quick)

Use this when you are mid-process:

- ■ Job exists in **Recruitment** (draft or published) with correct team
- ■ Approvals (Corporate Services / HR / POC-MoFPS / IRHC) filed in **Documents**
- ■ Short list matrix and interview score summary attached
- ■ Recruitment folder complete for the post
- ■ Offer issued and signed copy stored
- ■ Employee created / updated (team, manager, job)
- ■ Onboarding or probation Tasks open
- ■ Special projects: TRN/NIS/ID and Oath of Secrecy pack complete; ProJems/Finance handled outside

10. Training

Courses available to support the PMS cycle include:

1. **STATIN PMS Guidelines for Managers** — cascading plans into Individual Work Plans, scales and bands
2. **STATIN Performance Coaching** — running coaching conversations and opening a PIP when scores fall below 75%

Where to click

1. Sidebar → **Training**
2. Open the course
3. Enrol participants or request training if your process allows
4. Complete materials / sessions and track completion

Managers should enrol people on a development or PIP path (for example after an Unsatisfactory year-end result).

More help: [About the Training functionality](#) · [Training](#)

11. Documents

Spaces you will see

Space	Who it is for
Company internal documents	HR and authorised staff — policies, guides, recruitment packs, committee letters
Employee documents	Files on a person's profile (contracts, certificates, personal letters)
Company public (if used)	Content visible more widely in the company

Good practice for STATIN

1. Keep recruitment folders and IRHC / offer letters in **Documents** with clear names.
2. Assign personal files to the employee when they belong on the profile.
3. Use **e-signature** when STATIN requires a signed electronic copy.
4. Control access with **permission groups** so sensitive HR files stay restricted.

More help: [Documents & E-Signatures](#)

12. Permissions (who can see and do what)

Administrators configure **permission groups** under **Settings** → **Permissions**.

Typical pattern for STATIN:

Group idea	Access
Employees	Own profile, own leave requests, own reviews and documents
Managers	Team leave approvals, team performance, limited people data
HR / Staffing	Recruitment, leave admin, documents, broader employee data
Administrators	Settings, policies, permission groups

Ask HR if you cannot see a screen you need — it is usually a permission, not a missing feature.

More help: [Short guide to Permissions](#)

13. Quick reference by role

Employee

1. Check **Organization** profile (team, manager, job).
2. Request leave in **Time off**.
3. Complete **Performance** self-reviews and IWPs when invited.
4. Open **Training** courses assigned to you.
5. Find personal files under your profile **Documents**.

Manager

1. Approve team leave in **Inbox**.
2. Complete coaching and year-end reviews for direct reports.
3. Agree next-year goals / IWPs cascaded from Unit plans.
4. Support recruitment as hiring panel member when asked.
5. Enrol reports in development training when needed.

Human Resources / Staffing

1. Maintain teams, jobs and permission groups.
2. Run recruitment pipelines end to end.
3. Maintain leave types, policies and balance adjustments.
4. Launch and monitor PMS processes.
5. Keep competencies and Job catalog aligned.
6. File governance letters and this type of manual in **Documents**.

14. When you need more help

1. Search this manual for your process.
2. Open the matching article in the [Factorial Help Center](#).
3. Contact STATIN Human Resources for policy questions (IRHC, MoFPS, leave exceptions, appeals).
4. Use Factorial **Support** from the Help Center if something in the product does not behave as described.
