

SZV Performance Management, Employee Lifecycle & Self-Service

Detailed Factorial Demonstration Requirements

People & Culture

SZV Needs One Connected HR Platform

Factorial should demonstrate an integrated solution across four areas:

Area	Required Outcome
Performance Management	Goals, core values, competencies, coaching, ratings, development, and reporting in one cycle
Employee Lifecycle	Coordinated onboarding and offboarding workflows across P&C, ICT, Facilities, Payroll, Benefits, and management
Employee & Manager Services	Self-service requests, approvals, documents, dashboards, mobile access, and status tracking
Talent & Leadership	Leadership development, growth plans, talent reviews, succession planning, and workforce insights

Success means the platform connects organizational objectives, employee behavior, leadership development, and performance outcomes.

Performance Combines Results and Behaviors

SZV views performance management as a continuous process of planning, coaching, development, feedback, and evaluation derived below.

Dimension	Core Question
Performance Objectives	What did the employee achieve?
Core Values	How did the employee represent SZV’s expected behaviors?
Competencies	Which observable behaviors did the employee demonstrate?

The Cycle Has Three Formal Reviews

Phase	Timing	Decision Purpose
P1 — Planning	January	Agree goals, expectations, development objectives, and training needs
P2 — Mid-Year Review	June	Review progress, coach, address challenges, and adjust goals
P3 — Year-End Review	December	Complete final evaluations and plan development for the next year

January–December: one-on-one discussions, development conversations, coaching sessions, feedback meetings, and performance journaling.

Factorial should provide reminders, workflow prompts, feedback logs, and manager dashboards throughout the year.

P1 Establishes Goals and Expectations

Step	Planning Activity	Expected Factorial Support
1	Confirm the employee's role and departmental priorities	Display relevant role, department, and objective context
2	Create individual SMART goals	Guided goal entry with due dates, measures, and ownership
3	Link goals to departmental key performance indicators	Cascading relationship from department to employee
4	Assign competency and core value expectations	Role-based evaluation templates
5	Record development objectives and training requirements	Integrated development and learning plan
6	Submit for employee and manager agreement	Approval workflow, notification, and audit trail

Goal ranges: **Staff 6–10 goals | Management Team 8–12 goals | Executive Team 8–12 goals**

P2 Converts Progress into Coaching Actions

Step	Mid-Year Activity	Expected Factorial Support
1	Review progress against each goal	Current status, evidence, and progress indicators
2	Discuss achievements and challenges	Structured review form and discussion notes
3	Identify coaching opportunities	Coaching action, owner, and follow-up date
4	Assess competencies and behaviors	Behavior-based interim evaluation
5	Adjust objectives when circumstances change	Controlled change with approval and history
6	Update development and training plans	Revised development activities and reminders

Continuous coaching should support one-on-one notes, feedback meetings, development conversations, coaching sessions, and performance journaling.

P3 Closes the Year and Opens the Next

Step	Year-End Activity	Expected Factorial Support
1	Complete final goal assessment	Compare achieved results with agreed measures
2	Evaluate core values	Rate observable behavior with comments and evidence
3	Evaluate competencies	Apply the correct role-based competency set
4	Calculate the overall performance result	Automated weighting and rating calculation
5	Conduct the overall performance discussion	Employee and manager input, acknowledgement, and sign-off
6	Create the next-year development plan	Carry forward agreed development and training actions

Factorial should retain a complete record of ratings, comments, approvals, changes, and development commitments.

Objectives Must Reflect Role and Business Priorities

Objective Category	Illustrative Measures
Customer & Service	Customer satisfaction score, customer experience score, and service improvement
People & Engagement	Employee engagement targets, coaching, and training support
Financial & Operational	Budget management, budget cycle management, and process efficiency
Strategy & Projects	Strategic project delivery, stakeholder management, and transformation initiatives
Compliance & Improvement	Legislative compliance, process automation, innovation, and operational enhancements

Goals must be measurable, linked to organizational priorities, and reviewable during P2 and P3.

Five Core Values Apply to Every Employee

Core Value	Observable Behaviors
I Lead The Way	Leads by example, coaches others, shares knowledge, demonstrates accountability, and drives innovation and improvement
I Love To Serve	Delivers excellent customer service, takes ownership of requests, represents SZV positively, and demonstrates service excellence
I Collaborate and Work Well With Others	Encourages teamwork, communicates respectfully, provides constructive feedback, and supports psychological safety
I Show Respect	Behaves professionally, considers other opinions, and follows up on commitments
I Am Dependable	Takes ownership, delivers accurate information, and meets commitments and timelines

Factorial should allow comments, examples, evidence, and consistent behavior-based rating guidance.

Competencies Change based on Employee Roles

Employee Group	Competency Set
All Employees	Accountability, Commitment, Execution, and Result Driven
Executive Team	Leadership, Strategic Capacity, Diplomacy & Tact, and Helicopter View
Management Team	Leadership, Planning & Organizing Capability, Quality Focused, and Collegiality
Role-Specific Competencies	Functional competencies assigned according to the specific function

Factorial should automatically assign the correct competencies by employee group while allowing approved role-specific additions.

Weighting Must Adapt by Employee Group

Employee Group	Performance Objectives	Competencies	Core Values
Staff Employees	50%	30%	20%
Managers	40%	35%	25%
Leadership	40%	40%	20%

Demonstration focus:

1. Apply the correct weighting automatically.
2. Calculate the overall result without manual spreadsheets.
3. Show how leadership competency scores influence the leadership rating.
4. Retain the calculation logic and audit history.

The Five-Point Scale Needs Clear Rules

Rating	Meaning	Measurement Definition
NM	Did Not Meet Expectations	50% or less of deliverables achieved
MS	Met Some Expectations	More than 50% and up to 80% achieved
ME	Met Expectations	80% to 100% achieved
EE	Exceeded Expectations	100% achieved on time plus proactive contributions such as process improvement, coaching, training support, or operational enhancement
SE	Significantly Exceeded Expectations	100% achieved on time plus strategic contributions such as organization-wide improvements, strategic innovation, framework enhancement, or transformation leadership

Factorial should display definitions at the point of rating and validate calculations consistently.

Leadership Data Should Drive Development and Succession

Requirement	What Factorial Should Demonstrate
Leadership Development	Leadership competencies and development actions linked to performance outcomes
Coaching Documentation	Notes, actions, owners, due dates, and follow-up history
Individual Growth Plans	Development priorities, training, stretch assignments, and progress review
Talent Reviews	Consolidated performance and potential information for leadership discussion
Succession Planning	Successor nominations, readiness, development needs, and role coverage
Goal Cascading	Organization → Department → Individual objective relationships

Onboarding Starts Before the First Day

Stage	Key Activities
1. Offer & Acceptance	Job offer approval, candidate acceptance, and reference checks
2. Documentation	Collect documents, create the employment contract, and obtain policy acknowledgements
3. Scheduling	Plan onboarding sessions and coordinate the first-day agenda
4. ICT & Facilities	Create user and email accounts, request badge, prepare workspace, and allocate equipment
5. First-Day Experience	Conduct onboarding, benefits enrollment, policy review, office tour, and team introductions
6. Employee Registration	Complete payroll, pension, health insurance, HRIS activation, and organization chart updates

Factorial should show responsible owners, due dates, dependencies, reminders, approvals, and completion status.

Onboarding Continues Through Probation

Follow-Up Point	Purpose	Expected Workflow Action
1-Week Check-In	Confirm access, equipment, orientation, and immediate support	Automatic reminder and manager/employee confirmation
30-Day Check-In	Review integration, role clarity, and early training needs	Structured check-in form and action list
60-Day Check-In	Review progress, capability development, and support gaps	Development update and escalation where needed
90-Day Check-In	Evaluate transition and readiness	Manager review and employee feedback
Probation Evaluation	Complete the formal probation decision	Review workflow, approvals, and documentation
Training Follow-Up	Confirm completion of assigned learning	Learning status, reminders, and evidence

Offboarding Protects Access, Assets, and Knowledge

Stage	Key Activities
1. Initiation	Submit resignation or termination, acknowledge receipt, and confirm the last working day
2. ICT Offboarding	Deactivate accounts and remove system, Dynamics, and email access
3. Asset Return	Recover laptop, badge, office keys, and other company property
4. Exit & Knowledge Transfer	Conduct exit interview, complete handover, obtain manager sign-off, and clear outstanding actions
5. Payroll & Benefits	Calculate vacation payout, vacation allowance, Christmas bonus, and final payroll
6. Organizational Updates	Update organization chart and employee lists; notify benefits, vendors, and pension provider

Factorial should prevent closure until mandatory clearances and approvals are complete.

Employee Self-Service Should Handle Everyday Changes

Service Category	Employee Requests
Personal Information Mutations	Residential address, phone, personal email, emergency contact, marital status, dependents, beneficiaries, nationality, and payroll bank account
Employment Documents	Job letter, employment verification, salary confirmation, immigration support, service record, employment history, and recommendation letter
Leave & Absence	Vacation, sick leave notification, special leave, study, bereavement, maternity, paternity, unpaid leave, time-off, and balance inquiries
Benefits & Information	Health insurance, pension, benefit changes, verification letters, vacation statements, payslips, annual income statements, contracts, and policy library

The workflow should show submission, approval where required, document generation, notification, and status tracking.

The P&C Service Desk Needs Structured Case Categories

Request Category	Typical Cases
Payroll	Payslip inquiries, salary discrepancies, payroll corrections, overtime, vacation payout, bank updates, and payroll-cycle questions
Employment Administration	Position changes, transfers, promotions, contract extensions, temporary assignments, internships, and probation workflows
Employee Relations	Workplace concerns, complaints, grievances, harassment reports, policy clarification, and disciplinary documentation
Learning & Development	Training, certification, course enrollment, development plans, career discussions, and succession nominations

Factorial should provide ticket ownership, categorization, service-level tracking, communication history, escalation, and reporting.

The Factorial Mobile App Should Mirror Core Employee Services

Employees should be able to:

Mobile Capability	Expected Experience
Leave & Balances	Submit leave, view remaining balances, and monitor approval status
Documents & Profile	Upload supporting documents, view payslips, update personal information, and access policies
Service Requests	Submit requests, track status, and receive workflow notifications
Performance	Complete performance evaluation tasks and provide required input
Manager Actions	Approve requests and respond to notifications when the user is a manager
Communications	View organizational announcements and relevant company information

Factorial should demonstrate the same journey on desktop and the Factorial Mobile App.

A Typical Employee Journey Should Be Fully Self-Service

Factorial should demonstrate how employees complete common P&C requests from start to finish on desktop and in the Factorial Mobile App.

Employee Action	Expected Factorial Demonstration
1. Update Bank Account	Submit payroll bank account change with required supporting documentation and approval routing.
2. Request Job Letter	Select letter type, enter purpose or institution details, and submit for P&C processing or automated generation.
3. Submit Vacation Leave	Check available leave balance, submit leave request, and route it to the relevant manager for approval.
4. Receive Notifications	Receive status updates, approval notifications, and required follow-up prompts.
5. Track Request Status	View open, pending, approved, rejected, and completed requests in one employee dashboard.
6. Download Finalized Documents	Access approved letters, confirmations, payslips, statements, and finalized documents.
7. Use the Factorial Mobile App	Complete the same journey through mobile access with notifications and status visibility.

Success means employees can complete routine P&C requests without email dependency, manual follow-up, or unclear status updates.

Managers Need Complete Visibility and Control

Managers need tools to lead their teams effectively:

Manager Capability	Expected Factorial Support
Approvals	Approve leave, overtime, training, recruitment requests, expenses, and performance evaluations
Team Visibility	Access the team calendar, absence tracking, birthday/anniversary reminders, and contract expiration dates
Performance Management	Review team goals, conduct evaluations, record coaching notes, and track development progress
Recruitment & Onboarding	Initiate hiring requests, participate in interviews, and track new hire onboarding status
Data Access	View direct reports' job details, salary, benefits, leave balances, and relevant employment documents

Factorial should provide dashboard views that consolidate these actions for the manager.

Workflow Automation Must Strengthen Control and Transparency

Factorial should demonstrate routing, approvals, service tracking, escalation, digital documentation, and audit-ready governance.

Workflow Requirement	What Factorial Should Demonstrate
Automated Routing	Route requests to the correct manager, P&C owner, ICT, Facilities, Payroll, Benefits, or stakeholder.
Approval Hierarchies	Apply approval paths based on reporting structure, request category, and required authority level.
SLA Tracking	Make service timelines visible, measurable, and reportable for P&C service delivery.
Notifications & Reminders	Send employees, managers, and process owners automatic prompts and status updates.
Escalation Process	Escalate overdue, incomplete, or blocked requests to the appropriate owner.
Digital Document Generation	Generate standard letters, confirmations, forms, and workflow outputs from approved data.
Electronic Signatures	Capture approvals, acknowledgements, and sign-offs digitally.
Dashboards & Reporting	Show volumes, turnaround times, pending requests, workload distribution, and service trends.
Audit Trail & Compliance	Retain every submission, change, approval, rejection, completion, and status update for governance review.

The platform should support efficient service delivery while maintaining accountability, compliance, and a clear record of every request.

Reporting Should Drive HR Strategy

The platform must deliver actionable insights:

Reporting Area	Required Insights
Performance	Rating distributions, goal completion rates, cycle progress, and calibration data
Workforce Demographics	Headcount, turnover rate, tenure, age distribution, and diversity metrics
Absence & Leave	Sick leave trends, vacation liability, and Bradford factor (if applicable)
Recruitment & Onboarding	Time-to-hire, onboarding completion rates, and probation success
Service Desk	Ticket volume, resolution time, and request categorization

Factorial should demonstrate built-in dashboards, custom reporting capabilities, and data export functions.

Key Expectations for the Factorial Demonstration

✓ User Experience

Show an intuitive, modern interface across both desktop and the Factorial Mobile App.

✓ Workflow Automation

Demonstrate clear routing, approvals, and notifications for onboarding and offboarding.

✓ Performance Cycle

Show how goals, values, and competencies are evaluated together.

✓ Data Integration

Demonstrate how payroll, benefits, and HR data remain synchronized.

✓ Self-Service

Show how employees request changes and access their documents.

✓ Manager Empowerment

Demonstrate the dashboard and tools available to team leaders.

✓ Service Desk

Show how HR inquiries are categorized, tracked, and resolved.

✓ Reporting

Demonstrate actionable insights and dashboard analytics.

Thank You

Any Questions?

What Success Looks Like for SZV

Factorial successfully demonstrates an integrated HR platform supporting performance, service delivery, employee experience, and governance.		
✓ End-to-End Performance Management Planning, mid-year, year-end, coaching, and development in one cycle.	✓ Goal Cascading Organization to department to individual objectives.	✓ Core Values & Competencies Behavior-based evaluation against values and role competencies.
✓ Automated Weighting & Ratings Correct calculations for staff, managers, and leadership.	✓ Continuous Coaching Feedback, one-on-ones, journals, actions, and follow-up tracking.	✓ Leadership Development Leadership competencies, growth plans, and development actions.
✓ Talent Reviews & Succession Planning Data to support leadership discussions and future role coverage.	✓ Employee Self-Service Personal data updates, requests, documents, and status tracking.	✓ P&C Service Desk Ticket categorization, assignment, SLA tracking, escalation, and reporting.
✓ Factorial Mobile App Experience Mobile access for employees and managers.	✓ Manager Self-Service Approvals, team visibility, performance actions, and workflow oversight.	✓ Onboarding Automation Pre-boarding, access, facilities, registration, and probation follow-up.
✓ Offboarding Automation Access removal, asset return, exit, payroll, benefits, and updates.	✓ Workflow Governance & Compliance Routing, approvals, e-signatures, audit trails, and control.	✓ Reporting & Analytics Dashboards for performance, workforce, leave, onboarding, and service trends.

This slide is used as SZV’s evaluation scorecard during the Factorial demonstration.
